

JEHISON GERARDO GUTIÉRREZ DE LA BARRERA

Computer Systems Engineering
Student

About me:

I am a self-taught person capable of overcoming all the challenges that are presented to me. I like to be learning something new all the time, especially when it comes to programming or the world of technology. Thanks to the fact that I am constantly acquiring new knowledge every day it makes it easier for me to learn something new, which I consider to be the best advantage I can have.

EDUCATION

Computer Systems Engineering (2019 - Now)

Universidad Tecnológica Latinoamericana

E-learning (2019 - Now)

Udemy, Platzi, Coursera, Youtube, Linkedin Learning

EXPERIENCE

[Academic] Full-Stack Developer – Pokemon App (Oct 2021 – Nov 2021)

I developed an app to view, search and create pokemons. I developed all the app both front and back end. I used this technologies to develop the app: NodeJs, Express, React, Redux, Postgres SQL, Sequelize.

[Academic] Full-Stack Developer – House Catalog (Jun 2021 – Jul 2021)

I developed this project to show multiple houses and view some relevant information of each one. I developed the front and the back end of the app. Project was developed with NodeJs, Express, MySQL, Handlebars, CSS, JavaScript, HTML

[Academic] Full-Stack Developer – Mini Social Media (May 2021 – Jun 2021)

This app allows you to post images and add a title and description. It also allows to other users to comment, view and like the images and you can view your most relevant images posted. Developed with NodeJs, Express, MongoDB, Handlebars, CSS, JavaScript, HTML

[Academic] Videogame Developer - Yigovia (Apr 2020 – May 2020)

Participated as a developer in a 2D video game. I was in charge of the logic of the main character and the enemies. We use a framework for C# called "Monogame"
